SYNOPSIS LIONESS makes public, for the first time, the hidden history of a group of female Army support soldiers who became the first women in American history to be sent into direct ground combat. Told through intimate accounts and interviews with military commanders, the film follows five Lioness women who served together for a year in Iraq. This probing documentary reveals the unexpected consequences that began by using these Army women to defuse tensions with local civilians, but resulted in their fighting alongside Marine combat units in the streets of Ramadi. Together the women's narratives form a portrait of the emotional and psychological effects of war from a female point of view.
